

FEATURE	BENEFIT
Extreme outdoor protection with IP55 rated TV housing	Protects against the smallest dirt or dust entry, and more importantly against harmful intrusion of water, even sprayed in powerful jets - so driving rain, sprinklers, accidental pool splashing are all protected.
Waterproof and storable remote control	Just stick it anywhere on the metal housing. Now less likely to leave it lying around or the dog carrying it off. And if it does, it's waterproof from puddles, rain, dew, and ponds. Perfect for the backyard!
LED backlight LCD panel	Lower power consumption vs. standard ccfl backlight panel.
Low power consumption	Lowers home electricity costs. Uses less power than standard indoor TVs, and all other outdoor TV models.
Day/Night-dimming	Single brightness adjustment between daytime or nighttime viewing to improve picture quality.
Sunlight readable hyper-bright design	Nearly 2x brighter than the average indoor TV for excellent viewing in outdoor sunlight.
External TV control buttons	Make quick TV changes with controls for power, channel, volume, and source. Helpful when the kids have lost the remote.
Extra-long 10 ft AC power cord	Makes it easier to plug in outdoors where outlets are spaced farther apart.
Anthracite bezel color	Uniquely chosen to complement most outdoor decors.
Wide operating temperature range from 0C to 50C (32F to 122F)	Watch your Backyard TV in all kinds of weather no matter where you live.
Simplified remote control	In the backyard, anyone can quickly operate the TV without the complicated buttons of an indoor home theater.
Internal electronics silicon-based coating	Protects your TV electronics from condensation, dew, and high humidity.
Anti-glare and Anti-reflective screen	Improves your picture quality in the bright daylight by reducing glare and reflections.
Tempered front glass	Scratch and impact resistant safety glass.
No maintenance housing	Unique air flow system means no messy air filters to clean or replace.
Exceptional 8W powered speakers	Because the outdoors has more background noise, and you might like to watch from further away than your couch.
USB input	Plug in a USB drive and display your pictures or play music files with the remote control.
